IC-EDGE System Planner

Edge Controller[1], Number:

Type	Number	Name	IP configuration	Read IP Address[2] (**Yes**/No)	Profile[3]	Auto Answer (**Yes**/No)	Buttons [B1, B2,..] (Display)	Relay ID	Relay Function
TCIS-5	120	Entrance B	DHCP	No	Substation	Yes	B1:140 (Reception), B2:Ringlist 1 (Warehouse)	Remote (169.254.1.150)	Open door for 3 s by pressing 6

Ringlists 1

Number	Ring with previous

Ringlist 2

Number	Ring with previous

Address Book (TCIS-6, TCIV-6 and TFIE-6)

Number	Text

System parameters

Time server (**pool.ntp.org**)	Region	Time Zone	Web password (**alphaadmin**)	IP network

Notes:
(1) Select which Turbine device to use as Edge Controller. Use static IP for this device.
(2) *Read IP Address* should be turned off on devices in public area.
(3) Profiles: *Default, Substation, Display station, Operator*. There are different rules for outgoing calls, relay activation, group calls and busy override for these profiles. Default profile has many rights while Substation is a limited profile.
